

Complete Obedience  
On & Off Leash  
Program

## Adolescent Thru Adult Training - Over 6 months

**This comprehensive 6-week full immersion program course begins with a On Leash Skills Education:**

The on-leash education comes first. We work on patience, manners, and light leash cues to teach the dogs to politely walk on a loose lead, sit, lie down, go to kennel or go to place all with leash cues. We also work extensively with socialization skills, waiting at the door, and patience with feeding. All commands are taught on leash with patience and repetition throughout this program.

For dogs who have already mastered pulling their owners all around, especially larger dogs more than 60 pounds, we jump right into some e-collar overlay to help teach neck point of contact so that dogs learn they can no longer use their brute strength to pull. These dogs have become conditioned to pulling, and our goal is re-sensitizing their necks to light leash cues.

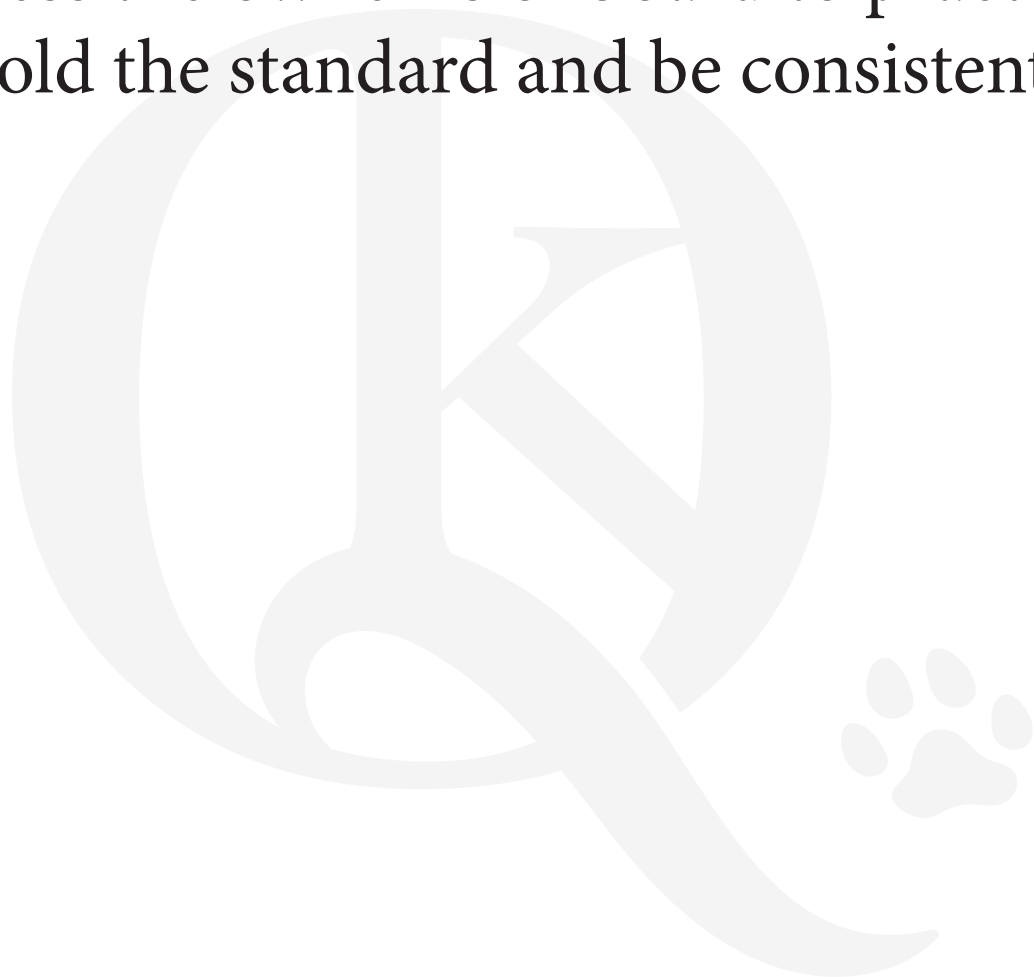

## Once we master the On Leash Skills, we move onto the Off Leash-Electronic Collar Education:

This program includes all the above teachings learned first on leash to teach point of contact cues which then are overlaid to light cues with the remote training collar stimulation. This enables us to cue the dog remotely to follow our go, come, sit, down, or place commands while having the capability to enforce the commands off leash. This program is great for active owners and their dogs who like to go hiking, biking, and running with their dogs off leash. Additionally, this program helps to correct behavior problems both inside and outside your home.

## You Role as a Committed Owner and Partner with Your Dog

While we will teach your dog an Obedience Foundation, unless the owner is dedicated and committed to consistently reinforce the training, the outcome will not be successful.

Your dog will have been taught a brand-new standard in this full-immersion program, and for 6 weeks they will practice patience, manners, and learn specific skills and new standards. They will never forget these skills; however they will also not be held accountable to automatically behave with this new standard taught by QK unless the owner is onboard to practice, uphold the standard and be consistent.

## Special Note for Adult dogs over 2 years old

If your dog has already reached adulthood without formal training, social skills with people and other animals, or has gotten away with problematic behaviors for 2 or more years, then we have our work cut out for us! Adult dogs have practiced muscle memories and specific behaviors which have become ingrained. We must re-boot, re-program, and re-train these dogs.

## Special Note for Rescue Rehabilitations

Regardless of the extent of the issues, we always start our training by teaching the basic on leash commands. Often rescued dogs have come from very unstable backgrounds to include neglect, abuse, lacked early care, nurturing and human interaction. These dogs have missed out on important learning curves and critical development periods. While we often make progress with these dogs, please understand, and accept that these dogs will take a tremendous effort and commitment with both the trainers as well as the owners. It is important to know that not all dogs can be suitable as family pets if they have come from such unstable backgrounds with the understanding that they may never achieve a safe level of behavior to be trusted around humans or other pets.

## Special Note for Aggressive Dogs

Dogs with known bite histories or dogs with severe aggression will no longer be accepted into our programs. These dogs can often be rehabilitated; however, they often need even more intensive training, behavioral modification, and a very strong and dedicated owner. There are different levels of aggression, and we base our decisions according to each dog's age, breed, size, weight, and history.

As much as we would love to help them all, we simply cannot accommodate them at this time. Please seek behavioral trainer specialists as we will no longer accept aggressive dogs due to their liability and danger to our QK staff and client dogs.

Because what we share,  
inspires all we do.™
